Distances inside a lamp	<ul style="list-style-type: none"> - Heating tests - Creepage distances - Components 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>Class II luminaires with fluorescent lamps. Are we going to measure the distance of an accessible metal part to live parts inside a lamp?</p>			
Decision			
<p>According to sub-clause 0.4.2 of the Standard, the lamp has not to be included, except where essential for the test.</p> <p>For the heating tests the lamp has to be used, but with regard to the creepage distances, the lamp is not included and the creepage distances shall not be measured from inside the lamp.</p> <p>According to the 7th paragraph of sub-clause 11.2.1, the values do not apply to components for which separate IEC Publications exist.</p>
