Ball pressure test	<ul style="list-style-type: none"> - Ball pressure test - Test method / equipment - Temperature in the oven and support 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>Sub-clause 13.2 gives a brief description of the ball pressure test, but no details or reference to additional requirements such as EN 60695-10-2. This makes it impossible to reference CTL DSHs relevant to the ball pressure test. For EN 60598-1 evaluations, what are the requirements for the ball pressure test, such as the oven, the stability of the temperature in the oven and support, water temperature, equipment used for measurement, size of the sample etc., for the purpose of keeping a harmonised approach?</p>			
Decision			
<p>Where not otherwise stated in the OSM/LUM standards, the requirements in the latest edition of EN 60695-10-2 apply, plus the related CTL DSHs such as DSH 2075.</p>
