**Question**

Some lighting chains are clearly dedicated to children bedrooms and have no specific temporary use like Christmas. An example of such lighting chain is given below.

For this kind of luminaire, do we have to apply EN 60598-2-20 only, or do we have additionally to take into account requirements of EN 60598-2-10?

**Decision**

The majority is in favour to the application of EN 60598-2-20.
