Accidental contact with live parts	<ul style="list-style-type: none"> - E27 - Self-ballasted LED lamps - EN 60529 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>Is it correct for E27 self-ballasted LED lamps to test the accidental contact with live parts only in the fully screwed-in position?</p>			
Decision			
<p>Yes, the test has to be done when the lamp is installed in the lampholder which means it is fully screwed-in. The process of screwing-in is covered by EN 60061 series (by gauges checking). This situation is not new, it was identical for incandescent lamps.</p>			
Explanatory notes
