

ECS operational staff meeting household appliances decision sheet			OSM HA N°325
Sub cl.	Meeting	Agenda item	Document
11.8	17	8.25	(IT)03/03
Standard	EN 60335-2-101:2002 +A1 :2008+A2 :2014	Date	2017-02-08
Question	Considering the different shapes of these appliances (see photos), which parts have to be considered as grids and 7 mm from the grids (i.e. other openings not clearly defined as necessary for the vaporising)?		
Decision	All parts through which the vapour exists are considered as grids.

Standard	EN 60335-2-101:2002 +A1 :2008+A2 :2014	Date	2017-02-08
Question	<p>The standard requires that during the test of sub-clause 19.101 the cotton sheet shall not smoulder or ignite.</p> <p>After this test are also applicable the requirements of sub-clause 19.13 (temperature rises of accessible surfaces), considering that with the cotton sheet wrapped on the vaporiser there are no accessible surfaces, or these temperature rises shall be measured only after the tests form 19.2 to 19.12 of the part 1 ?</p> <p>(In 19.1 of the part 1 is stated "Unless otherwise specified, compliance with the tests of this clause is checked as described in 19.13")</p> <p>In other parts 2 (i.e. 2-23 and 2-30) it is clearly stated which checking shall be made after the tests of clause 19.</p>		
Decision	Sub-clause 19.13 is not applicable after 19.101 because the sub-clause has its own compliance requirements..
